

Chemicals, Cancer and the Economy Training

Some chemicals have been found to cause cancer. From pesticides on our food to flame retardant chemicals sprayed on our furniture. Then why do we still use them?

This training will examine which chemicals are known to cause cancer and the economic incentives that encourage business leaders to use them. We will also develop an action agenda for New Jersey and what we can do to reduce exposures and advocate for change.

**Morristown United Methodist Church,
50 S Park Pl, Morristown, NJ 07960**
